Development of Redingote Style

the winter wardrobe now, lies in de-

ciding upon just what one wants. If it is a question of the street suit that is to be decided, a safe answer lies in two directions at least. The severely plain tailored suit, with plain skirt, cut shoe-top length and moderately wide, or a plaited skirt, may be chosen, to be worn with a semifitted coat having a flaring skirt portion, long, plain, rather close-fitting coat sleeves and a finish of bone buttons and inconspicuous stitching. The plain, tailored suit does not "come back" each season, for the simple reason that it never goes out. It is al-

Then there are suits on decidedly new lines. Among them those that belt are of the fur also. show the influence of the redingote which has inspired the designers of so many and such varied models. A

faith to it.

In this suit the skirt is not extreme-

The long coat is long-waisted, with the slightly curving line at the underarm seam which makes of it a semifitted model. It is becomingly doublebreasted, and this is a point that womways with us. With some variation en will do well to consider, for it does of lines or length or fullness it brings much for the figure. The straight its own style into line with the pass- loose-fitting sleeves are finished with a narrow cuff of velvet, headed with a band of skunk fur. The collar and

> Silk ornaments, a cord and clothcovered buttons give the spice of variety to the composition of the coat.

The difficult part of making ready | fine example of this style is shown in the picture and it is safe to pin one's

> ly wide. It has a flat panel at the front and back and is shaped to flare, with inverted plaits where the side gores are set in. It should be shorter than it is pictured here, extending not more than an inch or two below the top of the average walking shoe. It hips, and fastens at the side.

Ribbon and Lace in Headwear

Ribbons and laces continue to set | other edge of the ribbon and run a off the faces of maids and matrons during many hours of the day at

A cap is shown at the left of the picture given here which sells for fifty cents. It may be had in any of the lovely colors into which ribbons are dyed. Jonquil yellow, rose color, and blue are great favorites just now. It takes a yard of ribbon about five inches wide to make it, and a yard of narrow ribbon, one inch or a little less in width, to make the three small ribbon flowers and the short loops that decorate it. A yard of shadow lace edges the wide ribbon for a frill about the cap. This lace is bought in a five-inch width and split lengthwise to form two strips, one three inches wide and one two inches wide. to form the center of the crown.

To make the cap sew the lace stitching to form a casing for an cream-colored lace falls under the rib-elastic band that is to be run in it. bon frill about the face. Sew the narrower lace strip to the

gathering thread along its outer edge. Pull the thread up tightly and fasten it securely to form the center of the cap crown. Place a little ribbon flow er here to finish it.

Cut a length of elastic cord just long enough to extend about the head, and run in the casing formed of the lace joining the ends. The small ribbon flowers are made of five petals each, either cut from the ribbon and made separately or formed by gathering the ribbon to simulate petals. Millinery stamens are used for the centers.

A very wide ribbon is used for the cap at the right. It is shaped to the head by means of narrow tucks into which small cords are run. A bow of narrower ribbon trims the front and hanging loops and ends of very The wider strip is used for the frill narrow ribbon are placed at the back, about the face, and the narrower is all of the same color as the cap. gathered along one edge with a plaque | Four buckles, made of tiny chiffon roses in blue, yellow, pink and lavender or pale green require patient and edge to the ribbon with two rows of efficient work in making. A frill of

Coal mining and the coal trade generally in California lay little claim to importance among the industries of the state, particularly since the beginning of the present century, when the production of petroleum began to exert so powerful an influence on the fuel consumption of the Pacific coant. From 1916 ic 1912, inclusive, the coal production of the state was only a little more than 10,000 tons in each year; in 1913 work was resumed on the Stone 'anyon properties in Mon-

Being a man of considerable me- hour. was made from a large sawmill file did exist. and had a two-edged blade, nine it joined the handle to serve for stur- but what is known as a "thrasher" dy hammering. Bowie had a neat shark, a species which, it is said, is spring sheath made to inclose the more afraid of man than man is of it.

The inventor found himself con- ter with its huge tail. stantly in need of his weapon. One of his flercest neighbors was a Spaniard, who repeatedly annoyed the colonel with petty insults. At last Bowie challenged him. In accepting fits smoothly (but not tight) about the the hidalgo named knives as the weapons to be used and also stipulated that the combatants were to be seated face to face astride a trestle, the four legs of the trestle to be buried about a foot in the earth so that it could not by any possible means be

Each of the principals was permitted to use whatever kind of knife he might select. When the combatants met Bowie's knife excited the ridicule of his adversary. The result, however, proved the superiority of the "bowle" over the long Spanish hunting knife worn by his adversary. The Puck. men took their seats on a trestle, both naked to the waist. At a signal the Spaniard drew back his arm to make a lunge. Bowie at once thrust his knife straight forward into his adversary's body and killed him instantly. Bowie presented the knife used in this duel to Edwin Forrest, who always wore it when he played Metamora. The inventor had many other seri-

ous encounters, until his name and his knife were notorious. It sprang into such immediate popularity that locksmiths worked day and night forging and shaping them. Finally things became so warm in Louisiana that Bowie emigrated to

Texas, where he married the daughter of an ex-governor of that state. When Texas declared for independence Bowle accepted a commission as colonel in the insurgent army and closed his career March 6, 1836, at the bloody battle of the Alamo.

In spite of the notoriety that Bowie gained from his numerous deadly encounters, there is no known instance where James Bowle was the originator of any conflict, while, as a rule, he was a recognized pacificator. In truth, it is said that his nature was gentle, kindly and dignified, and his neither wins,

and long life.

FARMER'S WIFE TOO ILL TO WORK

A Weak, Nervous Sufferer Restored to Health by Lydia E. Pinkham's Vegetable Compound.

Kasota, Minn. — "I am glad to say that Lydia E. Pinkham's Vegetable Compound has done

more for me than anything else, and I had the best physician here. I was so weak and nervous that I could not do my work and suffered with pains low down in my right side for a year or more. I took Lydia E. Pinkham's Vege-

table Compound, and now I feel like a different person. I believe there is nothing like Lydia E. Pinkham's Vegetable Compound for weak women and young girls, and I would be glad if I could influence anyone to try the medicine, for I know it will do all and much more than it is claimed to do." - Mrs. CLARA FRANKS, R. F. D. No. 1, Maplecrest Farm, Kasota, Minn.

Women who suffer from those distressing ills peculiar to their sex should be convinced of the ability of Lydia E. Pinkham's Vegetable Compound to restore their health by the many genuine and truthful testimonials we are constantly publishing in the newspapers.

If you have the slightest doubt that Lydia E. Pinkham's Vegeta-ble Compound will help you, write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass., for advice. Your letter will be opened, read and answered by a woman, and held in strict confidence.
